

Jan E. Efraimsen, a native of Norway, is the founder and owner of Woodtronics, Inc. He started Woodtronics in 1986 after many years of employment with the Norwegian electronics company, Tandberg. He decided to call his business Woodtronics; 'tronics' for his knowledge of electronic equipment and 'wood' just because...well you know, wood.

Jan worked out of his garage in his home for several years gathering the necessary tools and learning the tricks of the trade. Since more business was available in the woodworking and construction field rather than electronics, he turned his attention and focus to master the art of fine custom woodworking. With the need for more space, the shop was moved to 1787 Front Street and as business began to grow at a rapid pace, Woodtronics relocated to 1661 Front Street and operates in a 7,000 sq. ft. facility.

Woodtronics manufactures custom cabinetry, built-ins/wall units, wood moulding, kitchens, bathrooms, wine cellars, closets, raised paneling, windows, doors and custom countertops in wood, laminate and Corian for both commercial and residential customers in the metropolitan area, but are not limited to this area as Woodtronics has recently completed jobs in Palm Beach, FL and Denver, CO.

Woodtronics is a member of the Architectural Woodwork Institute, the National Kitchen and Bath Association and was named one of the top growth companies published in Wood & Wood Products magazine. Woodtronics was also honored with the Safety Award from the AWI/CNA at the yearly AWI Convention in New Orleans this past October.

Jan and his wife have been long time residents of Yorktown.
